

# Complimentary security assessment services from SecurityScorecard

SecurityScorecard is an industry-leading security ratings service that monitors the cyberhealth of your ecosystem. Security ratings provide a way to continuously monitor security vulnerabilities in ten key risk categories ranging from Network Security to Patching Cadence. SecurityScorecard uses an easy-to-understand A-F grading system to rate your security posture across ten major risk factors and provides an overall score.

Security ratings provide a third-party, independent view of the security behaviors and practices of your own organization as well as those of your business partners. For many enterprises, security ratings are a required component of their overall security program and can help you make decisions about who you do business with.

*As an eligible AIG Cyber insured, you can receive complimentary security assessment services from SecurityScorecard.*

SecurityScorecard provides an ongoing, real-time security assessment. Our non-intrusive process delivers accurate and actionable network security insights and analysis designed to help you understand and resolve security issues within your network. Remediating vulnerabilities identified in your scorecard may help you obtain improved policy terms and conditions at renewal.

By accessing the SecurityScorecard platform directly, you can take advantage of the user interface, workflows, and other information designed to optimize your experience and support your dedication to maintain a healthy security posture.

Just ask your AIG Cyber Risk Consultant for an invitation to access your scorecard.

*SecurityScorecard offers the following complimentary services to eligible AIG Cyber clients:*

- 1-on-1 email and phone support and resolution services
- Joint working session calls with SecurityScorecard Customer Success Team and engineers
- Automatic recommended action plan (Score Planner) for issue remediation in order to achieve a “target” letter grade. If the recommendations don’t meet your needs, you can run interactive “what if” scenarios and create a customized action plan.
- Collaboration tools to help better manage security and ensure continuous compliance with regulatory standards and frameworks

The SecurityScorecard platform is based on transparency and collaboration. Our Customer Success and Customer Reliability Support teams are available to assist you with remediation and resolution of your issues. If you need assistance at any stage, get in touch by emailing [support@securityscorecard.io](mailto:support@securityscorecard.io). You can also contact AIG’s Cyber Risk Consultants at [cyberriskconsulting@aig.com](mailto:cyberriskconsulting@aig.com).

\*Clients who purchase CyberEdge and spend more than \$5,000 in premium qualify for the above services.

American International Group, Inc. (AIG) is a leading global insurance organization. Building on 100 years of experience, today AIG member companies provide a wide range of property casualty insurance, life insurance, retirement products, and other financial services to customers in more than 80 countries and jurisdictions. These diverse offerings include products and services that help businesses and individuals protect their assets, manage risks and provide for retirement security. AIG common stock is listed on the New York Stock Exchange.

AIG is the marketing name for the worldwide property-casualty, life and retirement, and general insurance operations of American International Group, Inc. For additional information, please visit our website at [www.aig.com](http://www.aig.com). All products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Products or services may not be available in all countries, and coverage is subject to actual policy language. Non-insurance products and services may be provided by independent third parties. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds, and insureds are therefore not protected by such funds.
